Executive Summary

Consolidated EcoIQ assessment — Global Liman İşletmeleri — June 2026

| | | | | | |
|----------------------------|--|--|---------------------------------------|-----------------------------------|-----------------------------------|
| 49.4 EcoIQ SCORE | High Impact / Weak Repair TIER CLASSIFICATION | 0 CO ₂ T/YR REDUCED | \$0M TOTAL CLEAN INVEST. | 0 COMPLETED PROJECTS | 0 VERIFIED DOCUMENTS |
|----------------------------|--|--|---------------------------------------|-----------------------------------|-----------------------------------|

About the Company

Global Liman İşletmeleri is a transport company based in , Türkiye.

Key Findings

| | |
|----------------------------|--|
| EcoIQ Score | 49.4 / 100 — High Impact / Weak Repair. The score reflects weighted performance across 5 environmental pillars. |
| Pollution Footprint | Score 47/100 (weight 35%). Below threshold — emissions management needs urgent attention. |
| Reduction Progress | Score 53/100 (weight 25%). Score stable over observation period. |
| Investment | Score 48/100 (weight 20%). \$0M total clean investment across 0 projects. |
| Transparency | Score 51/100 (weight 10%). 0 verified documents, 0 pending review. |
| Community | Score 46/100 (weight 10%). 0 tonnes CO ₂ reduced annually, equivalent to 0 cars off the road. |

EcoIQ Score Intelligence

Five-pillar breakdown — weighted composite score analysis

5-Pillar Performance Radar

Pillar Score Breakdown

EcoIQ Score Formula

$$= \text{Pollution} \times 35\% + \text{Reduction} \times 25\% + \text{Investment} \times 20\% + \text{Transparency} \times 10\% + \text{Community} \times 10\%$$

$$= (47 \times 0.35) + (53 \times 0.25) + (48 \times 0.20) + (51 \times 0.10) + (46 \times 0.10) = 49.4$$

Pillar Scoring Detail

| PILLAR | WEIGHT | SCORE | CONTRIBUTION | ASSESSMENT |
|---------------------|--------|-------|------------------|--|
| Pollution Footprint | 35% | 47 | 47x35% = 47x0.35 | Weak — significant gaps; priority intervention required. |
| Reduction Progress | 25% | 53 | 53x25% = 53x0.25 | Weak — significant gaps; priority intervention required. |
| Investment | 20% | 48 | 48x20% = 48x0.20 | Weak — significant gaps; priority intervention required. |
| Transparency | 10% | 51 | 51x10% = 51x0.10 | Weak — significant gaps; priority intervention required. |
| Community Impact | 10% | 46 | 46x10% = 46x0.10 | Weak — significant gaps; priority intervention required. |

5-Year Emissions Trend

60-month EcolQ score trajectory —

Trend Interpretation

| | |
|-------------------------|--|
| Trajectory | Stable performance over the observation period. While stability is noted, proactive improvement is still expected by 2030 targets. |
| Tier Progression | Current tier: High Impact / Weak Repair . Next tier milestone: reach 55 pts (Improving but Polluting) — requires approximately 49 → 55 additional composite points. |
| Data Coverage | 0 monthly data points covering . All pillar scores are tracked at monthly cadence; composite score is computed monthly. |

Environmental Impact Analysis

CO₂ reduction, pollution footprint, and community benefit metrics

Pollution Burden Analysis

| | |
|--------------------------------------|--|
| Pollution Footprint Score | 47/100 (Score ≥70 = Good, 50–69 = Moderate, 35–49 = Concerning, <35 = Critical) |
| Reduction Progress Score | 53/100 Year-on-year improvement rate vs sector benchmark. |
| Annual CO₂ Avoided | 0 t/yr (completed + active projects). Pipeline adds a further 0 t/yr when operational. |

RECOMMENDATIONS

===== #}

Priority Recommendations

AI-assisted gap analysis — based on pillar scores and evidence base

CRITICAL

Deploy Continuous Emissions Monitoring (CEMS)

Pollution Footprint +8–15 pts

No real-time stack monitoring found in the evidence base. CEMS provides tamper-evident, near-real-time telemetry that satisfies both Kazakhstan Environmental Code (2022) Tier-1 requirements and MSCI ESG data quality thresholds.

Aligned SDGs: **SDG 9** **SDG 11** **SDG 13**

HIGH

Set a Science-Based Emissions Reduction Target (SBTi)

Reduction Progress +10–18 pts

No independently verified GHG pathway detected. An SBTi 1.5 °C-aligned commitment unlocks green bond eligibility, improves Bloomberg ESG score inputs, and signals credibility to institutional investors applying Paris-aligned screening.

Aligned SDGs: **SDG 13** **SDG 17**

HIGH

Increase Environmental Capex to ≥1% of Annual Revenue

Investment pillar +12–20 pts

Current clean investment appears below the sector median for Transport. The 1% annual revenue threshold is the MSCI ESG benchmark used to distinguish "credible commitment" from "token compliance" in heavy-industry ratings.

Aligned SDGs: **SDG 9** **SDG 13**

MEDIUM

Publish Annual GRI/TCFD-Aligned Sustainability Report

Transparency +15–25 pts

No GRI Standards, TCFD framework, or CDP disclosure found. Annual third-party assured reporting is now expected of all Tier-1 permitted emitters under Kazakhstan's Environmental Code revision (2022), and required for S&P 500 supply-chain ESG audits.

Aligned SDGs: **SDG 16** **SDG 17**

Note: These recommendations are generated by EcolQ's AI gap-analysis engine using pillar score thresholds and publicly available evidence. They are indicative only and do not constitute formal environmental or legal advice. Full due diligence by qualified environmental consultants is recommended before implementation.

UN Sustainable Development Goal Alignment

SDG mapping across 0 environmental projects — 0 goals addressed

Active SDGs (coloured) are those directly addressed by at least one project. Greyed tiles are not yet covered by current project portfolio.

Scoring Methodology

How EcoIQ scores are computed and what they measure

| PILLAR | WEIGHT | WHAT IT MEASURES |
|----------------------------|------------|---|
| Pollution Footprint | 35% | Total greenhouse gas emissions, PM2.5, NOx, SOx relative to sector benchmarks. Lower absolute pollution = higher score. |
| Reduction Progress | 25% | Year-on-year decline in emissions intensity. Captures the rate of improvement — essential for Paris Agreement alignment. |
| Investment | 20% | Environmental capex as % of annual revenue, including clean energy, efficiency upgrades, and remediation. MSCI benchmark: $\geq 1\%$ for "credible commitment". |
| Transparency | 10% | Quality of public environmental disclosures. Covers GRI alignment, CDP filings, third-party assurance, and public audit availability. |
| Community Impact | 10% | Measurable benefit to communities: households with clean heating access, air quality improvement, water safety, employment in clean economy. |

Tier Classification

| Score Range | Tier | Meaning |
|---------------|----------------------------------|--|
| 85–100 | Restorative Leader | Net-positive impact — actively restoring ecosystems beyond compliance. |
| 70–84 | Transition Leader | On a credible Paris-aligned trajectory with demonstrated investment. |
| 55–69 | Improving but Polluting | Positive trend but material pollution burden remains. Structural improvement needed. |
| 40–54 | High Impact / Weak Repair | High pollution footprint with insufficient remediation investment. Regulatory risk elevated. |
| 0–39 | Major Polluter | Among the highest-impact emitters with minimal evidence of remediation. Immediate action required. |
